Lincor wins major contract with world renowned Great Ormond Street Hospital, London - a leading global centre of excellence for care of children

Lincor Solutions wins contract to install MEDIVista, its pioneering bedside point of care solution for access to Electronic Health Records, patient entertainment and education

11th March 2010: Lincor Solutions has today announced that it has won the contract to deliver bedside entertainment and education at Great Ormond St. Hospital, London.

Peter Wollaston, Head of Corporate Services at Great Ormond Street comments "The hospital has very good feedback from patients and parents, with 94 per cent of them saying they were very satisfied or satisfied with the care they receive. [1] However, some issues are persistently less satisfactory with bedside entertainment being one of them."

"We both need to ensure that children and young people are entertained, because boredom is a big issue for them, but also for longer stay patients, we can work with our on site school to keep up their education."

The first phase of the project, which will see Lincor's technology deployed at 220 bedsides, will go live in mid 2010 and will deliver enhanced entertainment and education services to patients – with the flexibility at a later date to deliver secure access to Hospital Information Systems at the point-of-care.

Lincor's MEDIVista solution will provide a wealth of entertainment services including Freeview TV channels; internet ; instant messaging; movies; radio including Radio Lollipop and will also allow the GOSH School to enhance its delivery of educational programmes to patients.

"We chose Lincor because their solution offered us the most comprehensive answer to our needs together with their track-record in delivering end to end solutions at other hospitals around the world" commented Peter Wollaston

"The proven stability and reliability of the MEDIVista technology platform is paramount as we continue to work to improve the patient experience."

"We are obviously delighted Great Ormond Street Hospital choose Lincor as their partner and we are looking forward to delivering a world class solution at Great Ormond Street " commented Richard Cooke, CEO for Lincor Solutions. "

NOTES TO EDITOR

Great Ormond Street Hospital for Children offers the widest range of children's health specialities on one site in the UK and is with the UCL Institute of Child Health the largest centre for health research for children outside the States.

A recent survey, conducted by Ipsos MORI, showed that 94 per cent of patients and their parents were either 'very' or 'fairly' satisfied with their last visit to GOSH. The vast majority (96 per cent) of those questioned had confidence and trust in the doctors, and the same proportion said they would be likely to recommend the hospital to a friend or relative if their child needed treatment.

About Lincor Solutions

Founded in 2003, Lincor Solutions (<http://www.lincor.com>) developed its patented MEDIVista solution for the provision of patient entertainment services and secure access to clinical applications at the point-of-care in hospitals – the patient bedside. MEDIVista is a fully digital solution providing a suite of triple-play entertainment services for patients across Internet, TV and Telephone as well as access to clinical applications such as Electronic Patient Records and XRay images. Lincor has the largest installed base of its type worldwide with in excess of 15,000 systems installed in over 60 hospitals worldwide.
