

# Patient care challenges

# 3.8 million

The US sees 3.8 million readmissions annually costing an average of over \$15k (£12k) per case<sup>1</sup>

The BMJ says 40% of patients cannot state their own diagnosis and management plan after discharge<sup>2</sup>

# 40%

“Your state of mind can dictate how quickly you can return from a physical setback”<sup>3</sup>

The WHO say that medication related harm represents 50% of all preventable harm in medical care<sup>4</sup>

# 50%

# 240k

Annually there are 240k hospital falls in the UK. Falls resulting in a hip fracture led to 1.8m bed days at a cost of £1.1B (\$850m)<sup>5</sup>
